

# UPDATED ACTIVITY REPORTS WITH PHOTOGRAPH

## REVISED NATIONAL TB CONTROL PROGRAM (RNTCP)

2016-17 to 17-18

### 1. 99 DOTS for TB HIV confection was launched on 3<sup>rd</sup> Feb 2017: -

It is mobile phone based system for monitoring the treatment and follow up of tuberculosis among confectioned individuals with HIV. It was initially rolled out in ARTC Centres in RIMS & JNIMS. Now it has covered in all the ART centres of the state.

Mobile based technology for TB-HIV DOTS

### 2. **Launching of Active TB Case Finding by Hon'ble Minister of Health & Family Welfare, Manipur on 22<sup>nd</sup> July 2017: -**

It is a provider initiated service to detect TB cases actively through house to house visit. The aim of the ACF is to detect all undetected TB cases in remote tribal areas, vulnerable groups like PLHIV, diabetes, geriatric home, orphanages, prisons, stone crushers, weavers etc. ACF was performed initially in 5 districts viz. Senapati, Thoubal, Bishnupur, Tamenglong & Ukhrul. In the 2<sup>nd</sup> phase 3 districts were covered in Churachandpur, Chandel and Imphal East. In the two phases of ACF, 67 TB cases were notified. More & more TB cases are expected to be notified through ACF in future.

Launching of Active TB Case Finding (ACF) by the Hon'ble Health Minister of Health & FW

### 3. Distribution of 27-two wheelers to the field staff of RNTCP: -

27- Two wheelers were distributed to the field RNTCP staff in all the districts of the state to supervise and monitor the RNTCP activities in the state.

	
Arrival 27 two Wheelers for RNTCP field activities	Distribution of Wheelers for RNTCP field activities by Hon'ble Minister of Health & Family Welfare

### 4. Launching of Daily Regimen of anti-TB drugs on 25<sup>th</sup> October 2017: -

In order to provide uniform treatment of tuberculosis both in public and private sectors, intermittent therapy has been shifted to daily regimen with the advantages of (1) better compliance, (2) reduced relapse cases of TB.

Launching of Daily DOTS in Imphal West

Launching of Daily DOTS in Chandel district

##### 5. Implementation of Schedule H1 on 17<sup>th</sup> November 2017: -

Private sectors take care of almost equal number of total TB cases. In order to enhance TB notification from private sectors, Schedule H1 was implemented in the state. With this, all the pharmacies selling anti-TB drugs have to report the details of the prescribers and patients. This data will be used for TB notification and follow up of cases.

State Mission Director, State Drug Controller  
and State TB Officer

Implementing Schedule H1 in the field  
(Jiribam)

##### 6. Launching of Universal Susceptibility Testing (U-DST) in October 2017: -

In order to detect all the drug resistant TB (DR-TB) cases, drug susceptibility testing is done for all the newly diagnosed TB cases. With this, treatment can be made appropriate right from the beginning. CBNAATs are installed in all 9 districts of the state.

CBNAAT for Universal Drug Susceptibility testing (-DST)

### 7. Arrival of Mobile CBNAAT van on 15<sup>th</sup> February 2017:

With its arrival, the CBNAAT (molecular technology, Cartridge based nucleic acid amplification test) can be utilized for camps, ACF and for other outreached areas.

Arrived on the 15<sup>th</sup> February 2018

Now, the garage is ready!

### 8. Establishment of district Drug Resistant TB (DR-TB) centre at RIMS, Imphal West.

With the establishment of DR-TB centre at RIMS, all the needy patients are admitted and treated, receiving specialized management of DR-TB patients.

On completion of DR-TB Centre, JNIMS
